Computer Methods in Applied Mechanics and Engineering 100 (1992) 433–437
North-Holland

Subject index of Volume 100*

Boundary element methods

Postbuckling analysis of plates on an elastic foundation by the boundary element method, H. Yuying, Z. Weifang and Q. Qinghua (3) 315–323

Collocation method

A collocation solution for Burgers' equation using cubic B-spline finite elements, A.H.A. Ali, G.A. Gardner and L.R.T. Gardner (3) 325–337
The numerical solution of laminar flow in a re-entrant tube geometry by a Chebyshev spectral element collocation method, A. Karageorghis (3) 339–358

Coupled problems

Three-dimensional finite element analysis of self-acting foil bearings, J.C. Heinrich and D. Connolly (1) 31– 43
A quadratic eigenvalue problem involving Stokes equations, C. Conca, M. Duran and J. Planchard (3) 295–313

Dynamics

A superelement formulation for mechanism analysis, A. Cardona and M. Géradin (1) 1– 29
Exact energy-momentum conserving algorithms and symplectic schemes for nonlinear dynamics, J.C. Simo, N. Tarnow and K.K. Wong (1) 63–116
A quadratic eigenvalue problem involving Stokes equations, C. Conca, M. Duran and J. Planchard (3) 295–313

Electromagnetic fields

Upwind finite volume schemes with anti-diffusion for the numerical study of electric discharges in gas-filled cavities, P. Arminjon and L. Smith (2) 149–168

Electronics

Upwind finite volume schemes with anti-diffusion for the numerical study of electric discharges in gas-filled cavities, P. Arminjon and L. Smith (2) 149–168

* The issue number is given in front of the page numbers.

Finite difference methods

Upwind finite volume schemes with anti-diffusion for the numerical study of electric discharges in gas-filled cavities, P. Arminjon and L. Smith (2) 149–168

Finite element and matrix methods

A superelement formulation for mechanism analysis, A. Cardona and M. Géradin (1) 1– 29
A new approach to algorithms for convection problems which are based on exact transport + projection, C. Johnson (1) 45– 62
Characteristic-Galerkin and Galerkin/least-squares space-time formulations for the advection-diffusion equation with time-dependent domains, O. Pironneau, J. Liou and T. Tezduyar (1) 117–141
Penalty finite element analysis of incompressible flows using element by element solution algorithms, M.P. Reddy, J.N. Reddy and H.U. Akay (2) 169–205
Plasticity models for the biaxial behaviour of concrete at elevated temperatures, Part I: Failure criterion, A. Khennane and G. Baker (2) 207–223
Plasticity models for the biaxial behaviour of concrete at elevated temperatures, Part II: Implementation and simulation tests, A. Khennane and G. Baker (2) 225–248
The problem of plate modeling: Theoretical and computational results, I. Babuška and L. Li (2) 249–273
A collocation solution for Burgers' equation using cubic B-spline finite elements, A.H.A. Ali, G.A. Gardner and L.R.T. Gardner (3) 325–337
Recent experiences with error estimation and adaptivity, Part II: Error estimation for *h*-adaptive approximations on grids of triangles and quadrilaterals, T. Strouboulis and K.A. Haque (3) 359–430

Fluid mechanics

A new approach to algorithms for convection problems which are based on exact transport + projection, C. Johnson (1) 45– 62
Characteristic-Galerkin and Galerkin/least-squares space-time formulations for the advection-diffusion equation with time-dependent domains, O. Pironneau, J. Liou and T. Tezduyar (1) 117–141
Penalty finite element analysis of incompressible flows using element by element solution algorithms, M.P. Reddy, J.N. Reddy and H.U. Akay (2) 169–205
A quadratic eigenvalue problem involving Stokes equations, C. Conca, M. Duran and J. Planchard (3) 295–313
The numerical solution of laminar flow in a re-entrant tube geometry by a Chebyshev spectral element collocation method, A. Karageorghis (3) 339–358

General Rayleigh–Ritz and Galerkin techniques

A new approach to algorithms for convection problems which are based on exact transport + projection, C. Johnson (1) 45– 62
Characteristic-Galerkin and Galerkin/least-squares space-time formulations for the advection-diffusion equation with time-dependent domains, O. Pironneau, J. Liou and T. Tezduyar (1) 117–141

Incompressible and near incompressible media

Penalty finite element analysis of incompressible flows using element by element solution algorithms, M.P. Reddy, J.N. Reddy and H.U. Akay (2) 169–205

Kinematics

A superelement formulation for mechanism analysis, A. Cardona and M. Géradin (1) 1– 29

Nonlinear mechanics

Postbuckling analysis of plates on an elastic foundation by the boundary element method, H. Yuying, Z. Weifang and Q. Qinghua (3) 315–323

Numerical solution procedures

A control volume method to solve an elliptic equation on a two-dimensional irregular mesh, I. Faille (2) 275–290
Postbuckling analysis of plates on an elastic foundation by the boundary element method, H. Yuying, Z. Weifang and Q. Qinghua (3) 315–323
A collocation solution for Burgers' equation using cubic B-spline finite elements, A.H.A. Ali, G.A. Gardner and L.R.T. Gardner (3) 325–337
Recent experiences with error estimation and adaptivity, Part II: Error estimation for *h*-adaptive approximations on grids of triangles and quadrilaterals, T. Strouboulis and K.A. Haque (3) 359–430

Plasticity

Plasticity models for the biaxial behaviour of concrete at elevated temperatures, Part I: Failure criterion, A. Khennane and G. Baker (2) 207–223
Plasticity models for the biaxial behaviour of concrete at elevated temperatures, Part II: Implementation and simulation tests, A. Khennane and G. Baker (2) 225–248

Shells and plates

Exact energy-momentum conserving algorithms and symplectic schemes for nonlinear dynamics, J.C. Simo, N. Tarnow and K.K. Wong (1) 63–116
The problem of plate modeling: Theoretical and computational results, I. Babuška and L. Li (2) 249–273
Postbuckling analysis of plates on an elastic foundation by the boundary element method, H. Yuying, Z. Weifang and Q. Qinghua (3) 315–323

Solution of integral equations (singularity method)

Postbuckling analysis of plates on an elastic foundation by the boundary element method, H. Yuying, Z. Weifang and Q. Qinghua (3) 315–323

Solution of ordinary and partial differential equations

A control volume method to solve an elliptic equation on a two-dimensional irregular mesh, I. Faille (2) 275–290
A quadratic eigenvalue problem involving Stokes equations, C. Conca, M. Duran and J. Planchard (3) 295–313
Recent experiences with error estimation and adaptivity, Part II: Error estimation for *h*-adaptive approximations on grids of triangles and quadrilaterals, T. Strouboulis and K.A. Haque (3) 359–430

Spline approximation

A collocation solution for Burgers' equation using cubic B-spline finite elements, A.H.A. Ali, G.A. Gardner and L.R.T. Gardner (3) 325–337

Stability in structural mechanics

Postbuckling analysis of plates on an elastic foundation by the boundary element method, H. Yuying, Z. Weifang and Q. Qinghua (3) 315–323

Structural mechanics

Plasticity models for the biaxial behaviour of concrete at elevated temperatures, Part I: Failure criterion, A. Khennane and G. Baker (2) 207–223
Plasticity models for the biaxial behaviour of concrete at elevated temperatures, Part II: Implementation and simulation tests, A. Khennane and G. Baker (2) 225–248
Postbuckling analysis of plates on an elastic foundation by the boundary element method, H. Yuying, Z. Weifang and Q. Qinghua (3) 315–323

Thermal effects and thermodynamics

Plasticity models for the biaxial behaviour of concrete at elevated temperatures, Part I: Failure criterion, A. Khennane and G. Baker (2) 207–223
Plasticity models for the biaxial behaviour of concrete at elevated temperatures, Part II: Implementation and simulation tests, A. Khennane and G. Baker (2) 225–248

Transport phenomena

A new approach to algorithms for convection problems which are based on exact transport + projection, C. Johnson (1) 45– 62
Characteristic-Galerkin and Galerkin/least-squares space-time formulations for the advection-diffusion equation with time-dependent domains, O. Pironneau, J. Liou and T. Tezduyar (1) 117–141

Turbulence

A collocation solution for Burgers' equation using cubic B-spline finite elements, A.H.A. Ali, G.A. Gardner and L.R.T. Gardner (3) 325–337

Viscous flow

A quadratic eigenvalue problem involving Stokes equations, C. Conca, M. Duran and J. Planchard (3) 295–313
